## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4 and 6-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Mehrmann(5934961).

Mehrmann relates to a bodyboard comprising a body (10) comprising a core (46) with multiple holes (18) defined at the top and bottom, an upper layer (12) securely attached to the top of the core, a lower layer (20) securely attached to the bottom of the core, and a protective strip (50) mounted on the edge of the body. Each hole is defined as a through hole as shown in figure-3. the protective strip comprises two strips mounted on the side edge of the body and abutting at the front (figure-3). The upper layer is a foam material such as polyethylene foam (col. 1, lines 52-57). The core is foam (col. 1, lines 24-25), including polyethylene foam. The lower layer can be of the same material as the top layer 9col. 4, lines 53-57).

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 1772

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Mehrmann in view of Moran (5647784).

Mehrmann, as discussed above, fails to teach that the protective strip is of foam material as that of the upper layer. Moran discloses that the protective strip 928, 36, 32) can be foam material or similar to the skin layers. Therefore, it would have been obvious to one having ordinary skill in the art to utilize Moran's teaching of using foam protection strip in the invention of Mehrmann with the motivation to provide for soft cushion feel to the user.
